Choreography Collection is a progressive composition of patterns designed to work together or solo. This versatile collection features one synchronised colour palette to make specifying a co-ordinated floor easy. Each pattern in the collection features a light to dark gradient in the background and when cut into tiles, no two are exactly the same, presenting a variable rhythm on the floor.

Concerto features the same backdrop as Fusion and Motion, providing a highly textured look without the strong lineal highlights, for a stylish and understated look.

Note: When installing Concerto planks on their own as a wall-to-wall installation, joins will appear more prevalent. This is due to the more subtle nature of the pattern and is a feature of this product that does not affect its performance.

Swatch colours are for guide purposes only.
