

## [1202] LOOSE LAYING TABLE TENNIS & BATECO

### ■ 1- TARAFLEX™ TABLE TENNIS

#### 1.1 - Laying out the flooring

- The ambient temperature must be above 15 °C.
- Strike the transverse and longitudinal axis of the sports floor on the subfloor.

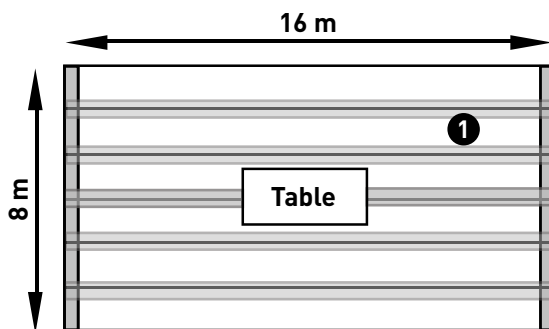

GERFLOR TABLE TENNIS is laid in the opposite direction from the table.

#### 1.2 - Flattening

The roll must be ALLOWED TO LAY FLAT widthwise in the sports hall for at least 24 hours leaving a 1 cm overlap between each length and following the numbered order of the different lengths.

#### 1.3 - Positioning

The roll are butted up to the axis and placed edge-to-edge without leaving a gap.

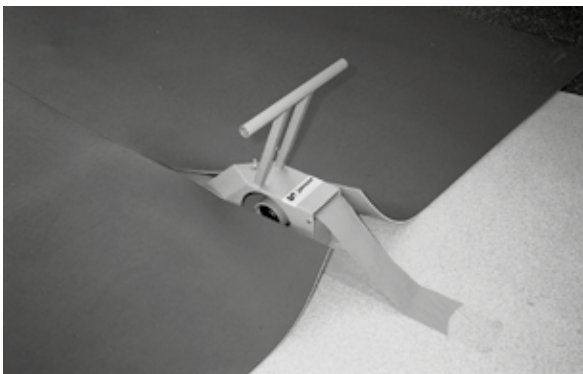

- ① Double side tape adhesive under each roll and extremities

#### 1.4 - Fixing the lengths

The lengths are held together with double-sided adhesive tape D 200 on varnish wood from GERFLOR. The double-sided adhesive tape is applied with a double side tape roller Ref. H372 0001 from Gerflor.

**Note:** If it is being put down on a varnished wood strip flooring, check the adhesion properties before installing. If the subfloor shows advertising logos or stuck-down game lines, they may be damaged.

#### IMPORTANT

GERFLOR cannot be liable for the performance of a double-sided adhesive tape which was not supplied by GERFLOR.

#### 1.5 - Removal of the court

Remove the double-sided adhesive tape using the same machine as before.

- Roll the lengths on their packing tubes foam inside :
  - either manually
  - or with a roll/unroll trolley
- Secure the sections with tightening straps
- Store the roll vertically or on suitable storing devices

### ■ 2 - REMOVABLE INSTALLATION OF THE BATECO PROTECTION FLOORING EXCLUDING SPORTING USAGE

**Remark:** Differences in width (tolerances) may exist between the strips.

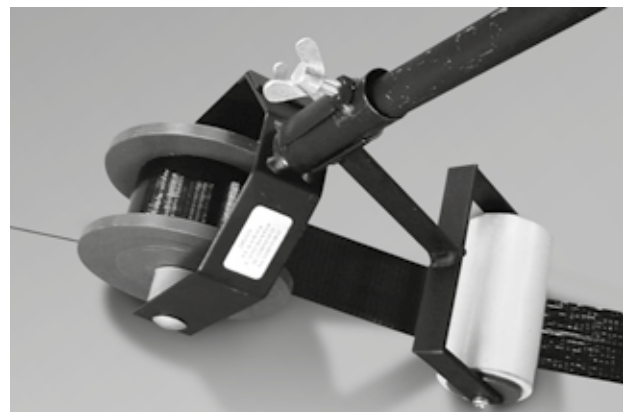

#### 2.1 - Unrolling

Unroll the strips by placing them side by side, as precisely as possible. There must not be any space between the strips.

**The Bateco product has no shielding, it is thus mandatory to leave 40 cm excess on a 20 m strip and to let the product relax after 3 uses before adjusting the dimensions of the product to the room.**

#### 2.2 - Assembly

We recommend assembly with a single-side adhesive applied with the 50 or 100 mm wide single-face tape reel AT7 Ref. H2060001 from Gerflor

Single-side tape reel - H367 0003
