

## GENERAL COMMENTS

Mural Plus is a homogenous PVC sheet material designed to be a permanent wall covering.

## DAILY MAINTENANCE

Periodic wiping with a damp cloth should be sufficient for day to day cleaning. Detergents may not be necessary, but if used, should be pH neutral (7), and rinsed off immediately.

## PERIODIC MAINTENANCE

Same as above, If there are any marks occurring as a result of collisions with trolleys etc, these can be removed by using a fine abrasive pad and warm water. Be careful not to apply too much pressure, as this can damage the protective layer.

## MAINTENANCE ISSUES

If the product is gouged as a result of impact with trolleys, furniture, machinery etc, it can be repaired in different ways:

- application of heat from a weld gun
- application of seam sealer
- replacement of damaged sheet

For further enquiries regarding the maintenance of Gerflor products, please contact your Gerflor Technical Manager.
